

LABELVIEW

BARCODE LABEL DESIGN SOFTWARE from TEKLYNX

LABELVIEW is an easy-to-use label design application for medium-complexity labeling environments. Featuring an intuitive interface, support for over 100 barcode symbologies, and simple database connections, LABELVIEW is a robust label design solution.

Setting the Standard
TEKLYNX
BAR CODE SOFTWARE

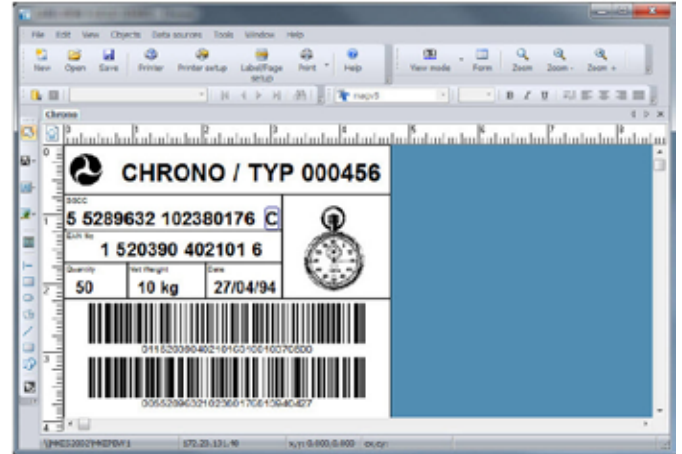

The logo graphic consists of a stylized globe or sphere with vertical black and white stripes, and a red swoosh element that curves around the bottom right of the sphere.

LABELVIEW

Add a powerful, easy-to-use barcode label design application to your company's business process that can be used by anyone from beginners to advanced users. LABELVIEW is a sophisticated and intuitive barcode and label design software. With the stability of LABELVIEW's updated platform, you will have the confidence that your software will be dependable today and in the future.

TEKLYNX Subscription Licensing is available for LABELVIEW. Subscription Licensing is the best option for maximum flexibility and long term value. The upfront cost of a LABELVIEW subscription license is lower, and it includes more value than ever before.

- Get updates on time, without spending extra time or money.
- Easily predict software costs for simplified and predictable budgeting.
- Take advantage of access to software maintenance and technical support.

FEATURES

LABELVIEW is packed with the features you need to meet medium-complexity label design needs.

- **Easy to Use** - Intuitive interface allows users to quickly become comfortable and efficient using the application.
- **Powerful** - 100+ barcode symbologies allow you to easily comply with industry standards.
- **Language Support** - LABELVIEW supports 25 languages within its interface and has the ability to print virtually any language.
- **Reliable** - Updated application platform makes LABELVIEW extremely stable.

BENEFITS

How can LABELVIEW help solve your business challenges?

- **Reduce Time Spent Designing Labels** - LABELVIEW allows you to create labels quickly using wizards, which reduces the overall time spent from initial label design to print time.
- **Reduce Errors** - Form Designer gives you the ability to create custom forms for accurate data entry. LABELVIEW's updated printing interface allows you to preview the label prior to printing, which acts as the final step in quality control.
- **Increase Productivity** - LABELVIEW's intuitive interface, coupled with simplified database connections and streamlined data entry, allows you to design labels and print them in a much shorter period of time.
- **Easy Entry into Enterprise Labeling Solutions** - LABELVIEW label files can easily be converted to CODESOFT files. As your labeling needs grow, you can easily expand your labeling solution with TEKLYNX.

HOW TO BUY

TEKLYNX sells its label design software through a network of Value-Added Technology Resellers.

1. Download a demo from teklynx.com/labelview, and try out the software for 30 days.
2. TEKLYNX contacts you to discuss your labeling needs and ensure you know which label design solution is right for your company.
3. TEKLYNX puts you in touch with a Value-Added Reseller in your area.
4. Purchase the software through the Reseller.

EDITION COMPARISON

Which edition of LABELVIEW is right for your labeling needs?

LABELVIEW Basic is the entry level version for printing labels without the possibility to connect to a database.

LABELVIEW Pro is recommended for small-scale barcode labeling operations, especially those with manual data input.

LABELVIEW Gold is the high-end edition and includes all features of LABELVIEW Pro, along with advanced design tools.

Note: To run LABELVIEW on a virtual machine, a VM license must be purchased.

Visit www.teklynx.com/labelview for more information.

LABELVIEW Feature	Basic	Pro	Gold
Virtual machine product available (tested and supported on virtual machines)		x	x
Network version available			x
Runtime (print-only) version available			x
Label samples, including MIL 129 / MIL 130L		x	x
Unicode font support	x	x	x
Variables	limited	x	x
Import graphics formats (bmp, pcx, jpg, tif, etc.)	x	x	x
Graphical, native and custom barcode support, including GS1, HIBC, and 2D barcodes	limited	x	x
Multi-level password protection, including label-specific passwords		x	x
Label previews	x	x	x
Citrix Server/Terminal Support			Network only
Print/export to picture or to file		x	x
OLE and ODBC support		x	x
TextArt Objects / Rich TextField Objects		x	x
Tagged Text			x
Counters linked to additional fields		x	x
Variable graphic images		x	x
Add a fixed offset to date	x	x	x
Add a variable offset to date			x
Data from text files			x
Directly modify printer code with Job Modifier utility			x
Shared data sources			x
OLE object support (embedded Word files, Excel files, etc.)			x
User-definable reports generated from label log files			x
Customizable data input screens for printing (Form Designer)			x

Is LABELVIEW your solution?

LABELVIEW is ideal for medium complexity labeling environments.

Companies who use LABELVIEW are starting to incorporate variable information into their labels by connecting their design software to an Excel spreadsheet or an Access database, which streamlines the labeling process and increases efficiency. LABELVIEW users still print directly from the label design solution, but might use advanced computing technology such as virtual machines.

Companies who use LABELVIEW typically have:

- 4 - 6 printers
- Multiple users designing and printing labels
- Multiple production lines with different design requirements
- Database-driven templates
- Label designs that incorporate numerous images

TEKLYNX Offers Solutions for All Levels of Labeling Complexity

LABEL MATRIX

- Simple labeling environments with fixed data
- Familiar Windows interface
- Helpful label design wizards

LABELVIEW

- Medium complexity labeling environments
- Simple database connections
- Customizable print forms
- Intuitive interface

CODESOFT

- High complexity labeling environments
- RFID support
- Complex database integration
- Regulatory compliance, such as:
 - Unique Device Identification (UDI)
 - Globally Harmonized System of Classification and Labeling of Chemicals (GHS)

Enterprise Label Management

- Maximum complexity labeling environments
- CODESOFT + SENTINEL integrates with any ERP system to completely automate label printing
- CODESOFT + LABEL ARCHIVE is for companies that need to track every aspect of the label design process and apply user permissions
- TEKLYNX CENTRAL is a centralized, browser-based label management solution for the whole enterprise

About TEKLYNX

TEKLYNX International is the world's leading barcode and RFID labeling software developer and solutions provider. An industry innovator for over 30 years, TEKLYNX helps companies operate smoothly and efficiently by implementing labeling solutions that streamline operations while staying ahead of industry-specific compliance and emerging regulations. TEKLYNX is world-renowned for its customer service; offering flexible purchase options, unparalleled service and support, and a comprehensive product offering that grows with companies over time. With operations in the United States, Europe, Japan, China and Singapore, more than 620,000 companies in over 120 countries look to TEKLYNX integrated software solutions for their standard of success.
